

Setup MongoDB Atlas

Step-1: Register yourself at <https://www.mongodb.com/cloud/atlas>
Go for a free account. Sign up from google account is recommended.

Step-2: Creating a cluster: Select the shared cluster option as your choice.

Step-3: Now select the following options:

- Cloud Provider & Region: aws
- Region: Singapore(ap-southeast-1)(recommended)
- Give a name to your cluster - Mycluster (say)

Step-4: After a successful cluster creation, do the following :

- Database Access : Select 'Database Access' option from the options on the left side of the window.
- Select +ADD NEW DATABASE USER.
- For ease, write user-id and password as the same. Now select Add User.

Step-5: Now select the following options for the User :

- Network Access: Go to the section 'Network Access' and click + ADD IP ADDRESS option. Click on ADD CURRENT IP ADDRESS and click confirm.
